MEDICINE CABINETS AND LIGHT BARS

Always remember when thinking of medicine cabinets that case dimensions are determined by the distance between wall studs set on 16" centers. The outside width of the case of a 16" medicine cabinet is 14 1/4" and the depth of the case behind the frame is approximately 3 1/2". 24", 36", and 42" medicine cabinets will have to be boxed in when recessed in the wall. All show ends are finished so the cabinets can be either recessed in the wall or flush mounted. All medicine cabinets without light bars attached are 29" tall, while medicine cabinets with contemporary light bars attached are 32" tall. Light bars will be polished brass unless another finish is requested.

BMC & BMLB cabinets will have both mirror doors hinged to the center of the cabinet. All show ends are finished.

Recessed center mirror medicine cabinets are constructed with both right and left medicine compartments that are hinged to the inside for a tri-view effect when opened. The center section is a fully recessed mirror that is surrounded with wood trim. Both the right and left compartment doors are actual doors with center panels removed and replaced with mirrors. A 48" Recessed center mirror medicine cabinet is constructed with a 22" center mirror and the 42" Recessed center mirror medicine cabinet has a 16" center mirror.

The TMC and TMLB cabinets are true tri-view style cabinets. It is constructed with three equal, flush mirror doors hinged to the inside of the cabinet. Like all the other types of medicine cabinets, these will have all show ends finished.

MEDICINE CABINETS AND LIGHT BARS

The TRLB and CTLB are stand alone light bar units. They have an overall standard height of 6 1/2". The depth of the case behind the frame is approximately 3 1/2". All show ends are finished so these items can be either recessed in the wall or flush mounted. These cabinets will have to be boxed in when recessed in the wall. Light bars will be polished brass unless another finish is requested.

TAPER FEET FURNITURE PLATFORM

TAPER FEET FURNITURE PLATFORM

- 6 3/4" Overall height. (The platform is 2 1/4" taller than the standard toe space. To align with adjacent cabinets, the base cabinet used in conjunction with the platform will need the height reduced by 2 1/4". A MDCDIM up-charge is not required for this circumstance only. This height adjustment will not be made by Brighton unless specified on the order.)
- The sizes shown are to match the corresponding cabinet sizes.
- The Platform will have a finished size of 3/4" deeper and 1 1/2" wider than listed. (Example: TAFP2421 will have overall dimensions of 25 1/2" wide by 21 3/4" deep)
- Designed to be used with a base cabinet having MLSTK (loose toe modification) applied.
- 3/4" plywood top with 3" wide solid wood edge on front and both sides. Machine edge profile as standard.
- 2" straight valances between the feet on front and both sides.
