BOOKCASES

All bookcases are 13" deep, with finished interiors as standard. They are made from plywood veneers with solid wood face frames made of the same specie. All top rails are standard with a 5" top frame rail or valance top rails can be added at no additional charge for most designs. See Wall section for valance types or send drawing for custom valance. Bookcase shelves will all be made of 3/4" plywood with 1 1/2" frame stock attached to the front edge of the shelf. The frame stock will be flush with the top edge of the adjustable shelves. The entire shelf will then be behind the face frame of the cabinet. Desired finished end options must be selected when needed as all ends are built unfinished as standard.

Wall bookcases from 30" to 48" tall are wall cabinets that have had their doors removed and interiors finished with valance top rail.

Countertop bookcases are designed to rest on the countertop when installed. They do not have a bottom face frame rail or a floor.

Base bookcases are really no more than wall bookcases with flush toe kicks added.

Tall bookcases are built with a face frame rail installed at 34 1/2" above the floor. Standard full height base doors can be fitted to this opening. Additionally they are made with a flush toe bottom frame rail. All 90" and 96" tall bookcases come with a full height frame (including the flush toe) that must be tipped up from the back to stand in the room. They also ship with the sub-toe platform unattached. The sub-toe must be slid into position when the cabinet is in its installation spot. Finished ends must also be considered when ordering bookcases 90" tall or taller. The sub-toe sides are not finished at the factory. A finished covering must be applied in the field to the sides of the toe area when it will be exposed. The sub-toe can be integrated at the factory by request for no additional charge. Contact Customer Service for other possible options.

See Wall, Tall, or Base sections for modifications and applicable pricing.

When ordering bookcases, please specify top rail valance type; straight valance is standard.

BASE BOOKCASE UNIT

- 13" deep, 34 1/2" high standard
- Two 3/4" adjustable shelves with 1 1/2" frame stock front edge
- 5" straight valance top rail, specify if other valance design is desired (no upcharge).
- Bottom rail with flush toe is 6" wide.

VERTICAL STACK BOOKCASE UNITS, 13" DEEP

WBU12VS3048 shown

- 13" deep, standard
- Wall cabinet with the look of two cabinets that have been stacked one on top of the other.
- Two frame openings, one top and one bottom with a center frame rail and fixed center floor dividing the two sections.
- Offered with top doors only equal to 12", 15", 18" or 21" high cabinets. Upper door heights will align with cabinet height that is equal to the first set of numbers listed in the nomenclature. See page W12 in the Wall Section for more details.
- Lower section is open (no doors) with matching wood interior throughout the entire cabinet as standard.
- Lower openings tall enough for shelves will have 3/4" adjustable shelves with 1 1/2" frame stock front edge.
- "Single door" indicates one door across width for each opening. "Two doors" indicates 2 butt-doors for each opening. Butt-door version pictured.
- Specify L or R for hinge side when applicable.
- Any height change will modify the cabinet in the lower section. The upper frame opening height will not change unless specified on the order and will require a frame change charge (MFC).
- FOL-C overlay cabinet has a 3" face frame mid-rail. All other overlays have a 1 1/2" face frame mid-rail.
- Cabinets 39" wide or greater will have a fixed center stile in both sections as standard.
- Add MOBREF, omit bottom rail and floor modification, for a vertical stacked CTBU look.

- Doors can be added with an upcharge.

ENTERTAINMENT CENTERS

24" DEEP ENTERTAINMENT CENTERS

These cabinets are 24" deep and 84", 90" and 96" tall to accommodate large televisions from most manufacturers. The entertainment center comes with pocket doors (minimum pocket door height is 16"), interior partitions, and one full depth adjustable 3/4" shelf in the top and two full depth adjustable 3/4" shelves in the lower section. The customer can remove partitions without compromising the structural integrity of the unit. The television sits on a wooden pullout swivel shelf that has a weight capacity of 130 pounds. The upper interior opening width will be 8" less than the overall cabinet width if FOL-C. If SOL or Inset, the interior opening width will be 9 1/4" less than the overall cabinet width. Example: 30" wide, FOL-C cabinet will have an interior opening size of 22" wide. The lower opening has full height doors that will align with an adjacent standard height base cabinet.

90" and 96" tall units will be shipped with a flush toe built into frame and a loose toe base (pictured below) designed for a smoother installation when ceiling heights are at 8' or lower. A finished covering must be applied in the field to the sides of the toe area when it will be exposed. If under 90" tall, sub-toe is incorporated into the cabinet. These units come standard with finished matching wood interiors and are built using 1/2" case material.

Any entertainment center that deviates from our standard configuration **must** have a drawing included with order. Most modifications and charges are available as with all other cabinets. Any entertainment centers with custom modifications **must** have a quote prior to ordering.

DVD-VIDEO TAPE STORAGE CABINETS

These cabinets are constructed as a pullout media storage cabinet, which is very similar to a spice pullout. These cabinets come in heights of 34 1/2", 54", or 84", and are 12" wide and 24" deep. Height includes a 4 1/2" flush toe kick.

The doors to these units are attached to the pullouts. Each door opens independently. Increasing the cabinet depth to 27" or 30" is an option, but the pullout depth does not increase. The pullout units are constructed from 5/8" solid maple. One adjustable shelf in each pullout unit.

Treat the media opening as if it were a hinge and specify if you want the opening on the left or right side as the pullout units are accessible from one side only. Left is illustrated on the three cabinets below.
