Adjustable natural maple rollout shelves with Blumotion full extension, undermount drawer glides on wood pilasters. If the rollout and its components need to have the specie and finish match the interior of a cabinet with a MWI modification, a quote must be submitted prior to the order being placed for correct pricing and material availability.

- Price per rollout shelf
- 100# weight capacity
- Routed handpull centered in top edge of box front.
- Dovetail construction
- Fixed center frame stile is omitted when adding a full width rollout to a cabinet 39" wide and over or a sink base.
- Not recommended for cabinets less than 15" wide. Not available for cabinets less than 9" wide or 12" deep.

****Note:** when using combination of rollouts and adjustable shelves in the same opening, rollouts will always be located at bottom of section unless otherwise specified.

See below for additional guidelines.

Rollout Installation Guidelines

We have classified the addition of rollouts into two different categories based on usage. First, adding rollouts to wall cabinets or an upper portion of any cabinet, will be based on the same set of rules. (Upper portion is defined as any section of any cabinet which also has a lower opening.) Then, the addition of rollouts to base cabinets and the lower portion of tall cabinets will be based on another set of rules.

1. Rollouts in wall units and upper portions of tall/base units. (Sink base cabinets will follow this same set of rules.)
 - a. When adding **a single rollout**, the rollout will be permanently mounted to the floor in that section, utilizing our Blumotion full extension under-mount glides.
 - b. Also, when adding **a single rollout**, the quantity of adjustable shelves in that section will remain the same.
 - c. When adding **more than one rollout** to a section all adjustable shelves will be deleted. When adding adjustable shelves back into the opening, each shelf will be notched to accept the ladders which are installed for the rollouts.
 - d. Also, when adding **more than one rollout** to a section our standard rollout ladder configuration will be utilized by installing the ladders full height in the interior of that section. (Full height is full usable height determined by Brighton.)
2. Rollouts in lower openings of base/tall units. (Except sink base cabinets.)
 - a. When adding **a single rollout** or **more than one rollout**, our standard rollout ladder configuration will be utilized by installing the ladders in the complete interior height of that section.
 - b. Also when adding **a single rollout** or **more than one rollout**, all adjustable shelves will be deleted. When adding adjustable shelves back into the opening, each shelf will be notched to accept the ladders which are installed for the rollouts.

These rules have been adopted as a standard practice for Brighton Cabinetry, Inc. Any deviation from this process must be in writing in the notes section of the order. All cabinets in our catalog with rollouts included will also follow the guidelines listed above.
